

AOM and Workware

Team Leader Induction

This Course suits

This one day course is aimed at Team Leaders who are either new to the role or are not familiar with the AOM approach and use of Workware, including individuals joining a unit with an established Operations Management process based on AOM and Workware.

Content Overview

The core principles of Operations Management control.

The AOM Planning and Management cycle and how Workware supports management performance.

Practical Workware skills in planning, recording and using reports.

Using Workware information with other managers in Loading and Variance Meetings.

Use of whiteboards and the daily control graphs to support team performance.

Benefits and Outcomes

By attending this course individuals will be able to participate effectively in the operational control of the business using the AOM approach and toolset.

They will have the confidence to contribute and manage their team using the Workware information.

Provides basis for Foundation Level AOM Accreditation.
