

Workware

System Administrator

This Course suits

This one day workshop for up to five participants is designed for individuals who will be responsible for supporting and maintaining the Workware tool.

The focus is on hands-on use of the software and includes a half a day's follow-up coaching on site.

Content Overview

- Workware architecture and data structures
- System setup and administration functions
- Security and account management
- Technical support tools and process

Benefits and Outcomes

As a result of this course, individuals will be able to establish and manage a controlled Workware environment for supporting the business application of the tool.
